

SUBJECT ON A PAGE GEOGRAPHY

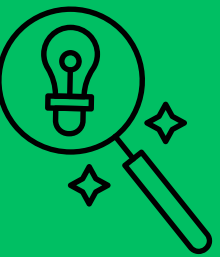

Inspiring Today's Children To Embrace Tomorrow's Challenges

VISION

Our Geography curriculum inspires children to explore and understand the world around them with curiosity and confidence. We empower every learner to communicate geographically — using knowledge, skills, and understanding to make sense of their place in an ever-changing world.

INTENT

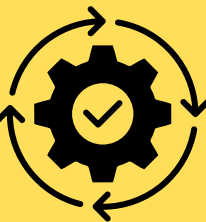

Through our Geography Curriculum we intend to:

- Develop a love of curiosity of the world and be ready to ask questions to develop their understanding.
- Appreciate the beauty of our planet and an awareness of how humans affect it both positively and negatively.
- Become caring respectful citizens accepting and empathising with the diversity of places and countries around the world.
- Communicate geographically using techniques and skills such as reading maps and analysing data.

IMPLEMENTATION

We will implement our curriculum through:

- The progression of skills outlined in the learning threads will be taught through topics in each year group following knowledge content that is organised into categories to aid children's ability to make links and remember more.
- Planning lessons which incorporate oracy, outdoor learning where possible, practical equipment and images to aid inclusivity.
- The progression of vocabulary is incorporated into lesson delivery.
- Providing a dynamic learning environment where we adapt learning to ensure inclusivity. We are committed to providing every child with access to our ambitious curriculum, fostering a culture of engagement and achievement that nurtures their individual potential and prepares them for future success.
- Starting their geographical journey in EYFS where they are taught to understand their physical world and community.

IMPACT

We will ensure impact through:

- Using POP tasks at the end of units enable teachers to assess what the children have learned to identify gaps in learning to revisit if necessary.
- Retrieval exercises that highlight previous learning and skills help them remember more.
- Children will be able to communicate geographically using the knowledge categories and learning threads.
